# Motivation

## Let's Count

Problem

Write a program that reads a positive integer n, and prints the numbers from 1 up to n.

Example

Please enter a positive integer:

4

1

2

3

4

01:16 46:38

# Counting and Summing Digits

16:36 / 46:38

Problem  
Write a program that reads a positive integer num, and prints the number of digits in num and their sum.

Example  
Please enter a positive integer:  
**375**  
375 has 3 digits and their sum is 15

# Computing The Average

NYU TANDON ONLINE

Problem  
Write a program that reads grades of students in a class, and prints the average.

Example  
Please enter the number of students in the class:  
**4**  
Enter the students' grades (separated by a space):  
**71 86 68 94**  
The class average is **79.75**

28:55 46:38

# Computing The Average

## Problem

Write a program that reads a sequence of grades (till -1 is entered), and prints the average.

## Example

Enter the grades separated by a space.

End your sequence by typing -1:

71 86 68 94 -1

The class average is 79.75

37:52

46:38
